

§ 1477.202

(5) Caused by theft, fire, or vandalism;

(6) Caused by the movement of bees by the producer or any other person; or

(7) Due to disease or pest infestation of the colonies.

§ 1477.202 Calculating rates and yields.

(a) Payment rates for 1998 single-year crop losses shall be:

(1) 65 percent of the maximum established RMA price for insured crops;

(2) 65 percent of the State average price for noninsurable crops;

(3) 60 percent of the maximum established RMA price for uninsured crops; and

(4) 65 percent of the established practice rate for damage to eligible trees.

(b) Disaster benefits under this subpart for losses to crops other than trees shall be made in an amount determined by multiplying the loss of production in excess of 35 percent of the expected production by the applicable payment rate established according to paragraph (a) of this section.

(c) Disaster benefits under this subpart for losses of trees shall be made in an amount determined by multiplying the quantity of acres or number of trees in a practice approved by the county committee according to instructions issued by the Deputy Administrator, by the payment rate established according to paragraph (a) of this section.

(d) Separate payment rates and yields for the same crop may be established according to instructions issued by the Deputy Administrator, when there is supporting data from NASS or other sources approved by CCC that show there is a significant difference in yield or value based on a distinct and separate end use of the crop. In spite of differences in yield or values, separate rates or yields shall not be established for crops with different cultural practices, such as organically or hydroponically grown.

(e) Each eligible producer's share of a disaster payment shall be based on the producer's share of the crop or crop proceeds, or, if no crop was produced, the share the producer would have received if the crop had been produced. In cases where crop insurance provides for a landlord/tenant to insure the tenant/

7 CFR Ch. XIV (1-1-01 Edition)

landlord's share according to part 457 of this title, disaster payments will be issued on the same basis.

(f) When calculating a payment for a unit loss:

(1) The unharvested payment factor shall be applied to crop acreage planted but not harvested; and

(2) The prevented planting factor shall be applied to any prevented planted acreage eligible for payment.

(g) Production from all end uses of a multi-use crop or all secondary uses for multiple market crops will be calculated separately and summarized together.

§ 1477.203 Production losses, producer responsibility.

(a) Where available, RMA loss records will be used for insured crops.

(b) If RMA loss records are not available, producers are responsible for:

(1) Retaining or providing, when required, the best verifiable or reliable production records available for the crop;

(2) Summarizing all the production evidence;

(3) Accounting for the total amount of unit production for the crop, whether or not records reflect this production; and

(4) Providing the information in a manner that can be easily understood by the county committee.

(c) In determining production under this section the producer must supply acceptable production records to substantiate production to the county committee. If the eligible crop was sold or otherwise disposed of through commercial channels, acceptable production records include: commercial receipts; settlement sheets; warehouse ledger sheets; or load summaries; appraisal information from a loss adjuster acceptable to CCC. If the eligible crop was farm-stored, sold, fed to livestock, or disposed of in means other than commercial channels, acceptable production records include: truck scale tickets; appraisal information from a loss adjuster acceptable to CCC; contemporaneous diaries; or other documentary evidence, such as contemporaneous measurements.

(d) Producers must provide all records for any production of a crop
